The UP Squared Robomaker Pro kit is the first robotics kit in production which bridges the gap between the virtual testing environment and the field. The deep integration of the hardware with Amazon RoboMaker delivers an unprecedented experience to the developer speeding up the time to production.

What’s in your kit

UP Squared board
Ubuntu 18.04 OS &
OpenVINO™ Tool Kit

Real Sense Camera(D435i)

UP AI Core X with heatsink

Wi-fi module

Wi-Fi Antenna kit

Motor module
Motor control board, Motor,
Wheels, Mechanical Parts

Spacers
To fix UP Squared

M3 Screws
To fix Intel Real Sense Camera

You’ll need the following, not included:
• A monitor with either HDMI or DisplayPort
• USB keyboard and mouse
• Ethernet cable (or optional Wi-fi)

For more information about your UP board, software, accessories and peripherals, please visit www.up-community.org
1 Your UP Squared board

2 Install the AI Core X & WiFi module

For more information about your UP board, software, accessories and peripherals, please visit www.up-community.org
Install Intel RealSense Camera to Motor Module

1. Remove the screws indicated in blue circle.

For more information about your UP board, software, accessories and peripherals, please visit www.up-community.org
ii. Take out the red plastic and install Intel Real Sense Camera with the m3 screws.

iii. Put the red plastic part and screws back.

For more information about your UP board, software, accessories and peripherals, please visit www.up-community.org
**Assemble Robomaker Pro Kit**

1. Remove the 4 Screws

For more information about your UP board, software, accessories and peripherals, please visit www.up-community.org
2. Use 3 spacers to fix the cooler as below photo indicated.
3. Put Antenna cable through the holes on the red bumper of motor module (fix with pressure)

4. Remove 2 screws on top of plastic plate

For more information about your UP board, software, accessories and peripherals, please visit www.up-community.org
5. Assemble Antenna cable
6. Put back the 4th spacer after antenna cable assembling.

For more information about your UP board, software, accessories and peripherals, please visit www.up-community.org
7. Connect TX/RX cable to GPIO ports of UP Squared.

For more information about your UP board, software, accessories and peripherals, please visit
www.up-community.org
8. Put Up Squared on top of mechanical plate and use 4 screws you removed from copper pillars to fix UP Squared.
For more information about your UP board, software, accessories and peripherals, please visit
www.up-community.org
9. Put back the plastic plate and screws to fix the mechanical plate to motor module.
10. Install Antennas
Power on

Please view following chart for connectivity overview.

1. Make sure to connect monitor before powering up – if the board is powered up before connecting a monitor, you may need to power cycle the board to see the display
2. Connect power supply to the board and click the small buttons of motor control board

Caution: this is a high-performance board and may get hot during operation.

For more information about your UP board, software, accessories and peripherals, please visit www.up-community.org
I. Port 9 should connect the Lipo battery balancer (JST connector)

II. Red T connector should connect the Lipo battery

III. Power should be connected through DC connector

For more information about your UP board, software, accessories and peripherals, please visit www.up-community.org
6 Log in

Log in to your Ubuntu OS with the following credentials:

Username: devkit
Password: devkit

If you have proxy settings set them now: (System Settings > Network > Network Proxy).

7 Get started

Open Cogniteam Wiki website: https://wiki.cogni.io/Category:HamsterProKit. Follow the instructions there to complete the setup and start your robotic project.

For more information about your UP board, software, accessories and peripherals, please visit www.up-community.org
Safety Precautions

Please read the following safety instructions carefully. It is advised that you keep this manual for future references.

1. All cautions and warnings on the device should be noted.
2. Make sure the power source matches the power rating of the device.
3. Position the power cord so that people cannot step on it. Do not place anything over the power cord.
4. Always completely disconnect the power before working on the system’s hardware.
5. No connections should be made when the system is powered as a sudden rush of power may damage sensitive electronic components.
6. If the device is not to be used for a long time, disconnect it from the power supply to avoid damage by transient over-voltage.
7. Always disconnect this device from any power supply before cleaning.
8. While cleaning, use a damp cloth instead of liquid or spray detergents.
9. Make sure the device is installed near a power outlet and is easily accessible.
10. Keep this device away from humidity.
11. Place the device on a solid surface during installation to prevent falls.
12. Do not cover the openings on the device to ensure optimal heat dissipation.
13. Watch out for high temperatures when the system is running.
14. Do not touch the heat sink or heat spreader when the system is running.
15. Never pour any liquid into the openings. This could cause fire or electric shock.
16. As most electronic components are sensitive to static electrical charge, be sure to ground yourself to prevent static charge when installing the internal components. Use a grounding wrist strap and contain all electronic components in any static-shielded containers.
17. If any of the following situations arises, please contact our service personnel:
   I. Damaged power cord or plug
   II. Liquid intrusion to the device
   III. Exposure to moisture
   IV. Device is not working as expected or in a manner as described in this manual
   V. The device is dropped or damaged
   VI. Any obvious signs of damage displayed on the device
18. DO NOT LEAVE THIS DEVICE IN AN UNCONTROLLED ENVIRONMENT WITH TEMPERATURES BEYOND THE DEVICE’S PERMITTED STORAGE TEMPERATURES (SEE FOLLOWING TABLE) TO PREVENT DAMAGE.

UP2 Robomaker Pro Kit
Quick users guide

FCC Statement

This device complies with Part 15 FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received including interference that may cause undesired operation.

Caution: There is a danger of explosion if the battery is incorrectly replaced. Replace only with the same or equivalent type recommended by the manufacturer. Dispose of used batteries according to the manufacturer’s instructions and your local government’s recycling or disposal directives.

Attention: Il y a un risque d’explosion si la batterie est remplacée de façon incorrecte. Ne la remplacer qu’avec le même modèle ou équivalent recommandé par le constructeur. Recycl er les batteries usées en accord avec les instructions du fabricant et les directives gouvernementales de recyclage.
