UP Xtreme Smart Surveillance
Quick users guide

UP Xtreme Smart Surveillance is a solution which reforms the traditional CCTV into an intelligent surveillance by applying deep learning and video analytics technologies. A smart surveillance understands what it sees and reacts on it; it monitors an area by creating a virtual fence, generates heatmap and counts people flow to give insights. All of these features come in one box—UP Xtreme Smart Surveillance. An AI-enabled NVR solution, it works proactively on the video stream and supports up to 32 cameras simultaneously.

What’s in your kit

UP Xtreme Edge Compute
Installed with Smart Surveillance
Software Package

Power Supply
EU/US Power Cords

You’ll need the following, not included:

- A monitor with either HDMI or DisplayPort
- USB keyboard and mouse
- Internet connection through either ethernet or Wi-Fi dongle (purchased separately)
- Switch for Camera connection

Caution:

1. Depends on the quantity and type of camera you want to connect; you may require different kinds of switch.
2. Please make sure your camera is listed within Milestone verified device list in following link.

UP Xtreme Smart Surveillance
Quick users guide

1 Your UP Xtreme Smart Surveillance

For more information about your UP board, software, accessories and peripherals, please visit
www.up-community.org
2 Power on

Please view following chart for connectivity overview.

1. Make sure to connect monitor before powering up – if the board is powered up before connecting a monitor, you may need to power cycle the board to see the display
2. Connect power supply to the board and plug in power supply to an outlet

Caution: this is a high-performance solution and may get hot during operation.

3 Log in

Boot up your Windows 10 IOT Enterprise OS and set your own credentials for your UP Xtreme Smart Surveillance Solution.

4 Windows License Activation

i. Right click on “This PC”, then click “Properties”
ii. Click on “Activate Windows”
iii. Click on “Change product key”

![Activation](image)

**Activation**

**Windows**

- **Edition**: Windows 10 Enterprise LTSC
- **Activation**: Windows is not activated
- **Product ID**: 00424-80000-80000-AACEM
- **Product Key**: XXXXXXXXXX-XXXXXX-XXXXXXX-P39FB

We can’t activate Windows on this device right now. You can try activating again later or go to the Store to buy genuine Windows. Error code: 0x800f0825

If you’re having problems with activation, select Troubleshoot to try and fix the problem.

![Troubleshoot](image)

**Activate Windows now**

Running a non-genuine copy of Windows can put you at greater risk for viruses and other security threats.

To get genuine Windows, enter a different product key. If you don’t have one, contact your system administrator.

![Change product key](image)
iv. Enter Windows Product Key Here, then click “Next”

Enter a product key

Your product key should be in an email from whoever sold or distributed Windows to you, or on the box the Windows DVD or USB came in.

Product key

[XXX-XXXXX-XXXXX-XXXXX-XXXXX]

Next  Cancel

v. Click on “Activate”

Activate Windows

By activating Windows, you get the best experience, free from interruptions.

Activate  Cancel

Get started

Open the video tutorial link as below. Follow the instructions to finish initial setting and start to play with your UP Xtreme Smart Surveillance.

Get started video tutorial: https://vimeo.com/showcase/uxss
There are 4 parts within the video tutorial. Please make sure you have watched Part 1 to Part 3 for setting up your solution.
- Part 1(First Boot, prepare XPROTECT)
- Part 2(XPROTECT Smart Client)
- Part 3(Prepare SAIMOS, add channels)
- Part 4(Face & Scrambler channels): additional license required for adding these channels
Safety Precautions

Please read the following safety instructions carefully. It is advised that you keep this manual for future references

1. All cautions and warnings on the device should be noted.
2. Make sure the power source matches the power rating of the device.
3. Position the power cord so that people cannot step on it. Do not place anything over the power cord.
4. Always completely disconnect the power before working on the system’s hardware.
5. No connections should be made when the system is powered as a sudden rush of power may damage sensitive electronic components.
6. If the device is not to be used for a long time, disconnect it from the power supply to avoid damage by transient over-voltage.
7. Always disconnect this device from any power supply before cleaning.
8. While cleaning, use a damp cloth instead of liquid or spray detergents.
9. Make sure the device is installed near a power outlet and is easily accessible.
10. Keep this device away from humidity.
11. Place the device on a solid surface during installation to prevent falls.
12. Do not cover the openings on the device to ensure optimal heat dissipation.
13. Watch out for high temperatures when the system is running.
14. Do not touch the heat sink or heat spreader when the system is running.
15. Never pour any liquid into the openings. This could cause fire or electric shock.
16. As most electronic components are sensitive to static electrical charge, be sure to ground yourself to prevent static charge when installing the internal components. Use a grounding wrist strap and contain all electronic components in any static-shielded containers.
17. If any of the following situations arises, please contact our service personnel:
   I. Damaged power cord or plug
   II. Liquid intrusion to the device
   III. Exposure to moisture
   IV. Device is not working as expected or in a manner as described in this manual
   V. The device is dropped or damaged
   VI. Any obvious signs of damage displayed on the device
18. DO NOT LEAVE THIS DEVICE IN AN UNCONTROLLED ENVIRONMENT WITH TEMPERATURES BEYOND THE DEVICE’S PERMITTED STORAGE TEMPERATURES (-20°C~70°C) TO PREVENT DAMAGE.
