

Board:

System:

- a. Insert the USB drive before connecting the 5V / 6A DC adapter. Upon receiving power, the board/system will turn on automatically.
- b. The board/system is set to automatically try to boot from the inserted USB drive
- c. You do not need to make changes to the BIOS settings to install the operating system.

For more info on the BIOS and how to change the BIOS password, see <u>https://wiki.up-</u> community.org

- 1. Make sure to connect monitor before powering up if the board is powered up before connecting a monitor, you may need to power cycle the board to see the display
- 2. Connect power supply to the board and plug in power supply to an outlet

Caution: this is a high-performance board and may get hot during operation.
