**Cc:** Kuankuan Cao; VictorLai 賴立凱; Srestha Gupta  
**Subject:** RE: up-shop.org - Sep tasks

Hi @Zhijie Xu,

Import simple product function (designed for stock status field automatically change to out of stock issue) is ready to use on UP Shop backend. I've tested it on UP Shop backend, and it works.

From now on, please use this function to update stock status/ stock quantity.

Please follow the instruction below:

You may use this file as an example for CSV file to use when importing products: [https://docs.google.com/spreadsheets/d/1VNtBfBCA72KknF3hLdAjPSBCOXi2VY\\_-1vgbQpLiTNg/edit#gid=0](https://docs.google.com/spreadsheets/d/1VNtBfBCA72KknF3hLdAjPSBCOXi2VY_-1vgbQpLiTNg/edit#gid=0)

Fields to enter:

- sku (enter product sku)
- qty (enter product quantity)
- is\_in\_stock (we always set it as "1" for "In Stock" status)
- additional attributes (enter "custom\_stock\_status=XXX")

Import CSV file:

On Magento backend, go to Catalog > Products > Product Import

- This feature is to update **EXISTING** products only, not creating new products.
- Please make sure the products that you're trying to import, already have all of the required fields filled out within that product.
- You can only upload CSV files.

Send to [info@up-board.org](mailto:info@up-board.org) for [@Srestha Gupta](#) as a reference, in case her mailbox was full when she is back.

Best regards,  
Michelle

Hi Michelle,

I'm happy to let you know that we've successfully pushed Import Simple Product feature onto production site. Feel free to test with the 3 test products we created this morning, for testing purposes. We've already disabled those 3 products after our testings, feel free to delete them if you like~

**Subject:** Re: [up-shop.org](http://up-shop.org) - Sep tasks

Hi Michelle,

For having the same fields as Magento's import history feature, there's a lot of grid tables and data required to be built for this feature, hence we would have to put this import history on a different place (not the same location as Magento's "Import History" [System > Import History] feature).

Unfortunately, there's no easy way to accomplish this function, since import history needs independent grid tables, model, and saving all the imported CSV files with/without errors, we're looking at an estimated total hours of 32 hours to build import history feature for simple product import.

For pushing the current import simple product feature onto production site, I would like to push it **tomorrow (Thursday, October 21st, 2021) at 10AM Taiwan time** (4AM Netherlands time). Let me know if you approve us to push during this proposed time~

Let me know if you have any questions.

Thanks.

Hi Michelle,

At the moment, no, there's no history to the import simple product feature that we've built.

If you'd like to add this feature, we will need you to provide us what kind of data/information you'd like to include within the history, and we can provide you an estimated hour required to add "Import History" feature.

Looking forward, thanks.

**Subject:** Re: [up-shop.org](http://up-shop.org) - Sep tasks

Hi Michelle,

Simple product import function is ready for your team to test on **Staging** site.

You may use this file as an example for CSV file to use when importing products: [https://docs.google.com/spreadsheets/d/1VNtBfBCA72KknF3hLdAjPSBC0Xi2VY\\_-1vgbQpLiTNg/edit#gid=0](https://docs.google.com/spreadsheets/d/1VNtBfBCA72KknF3hLdAjPSBC0Xi2VY_-1vgbQpLiTNg/edit#gid=0)

Fields to enter:

- sku (enter product sku)
- qty (enter product quantity)
- is\_in\_stock (enter "0" for "Out of Stock" status, or enter "1" for "In Stock" status)
- additional attributes (enter "custom\_stock\_status=XXX")

Import CSV file:

On Magento backend, go to Catalog > Products > Product Import

← → ↻ [mcstaging-up-shop.org/ups55ubn22apanel/catalog/product/index/key/80b747f56f752d7a01ad0822a6eb09142642abadc8abfd4e681154df4dc86f02/](#) ☆

Hi Srestha,

When using a coupon code, and its discounted amount is larger than the order amount, it would display as what you saw for those two orders (Total Paid > Grand Total).

It is a correct display as it is a default Magento feature. The reason that we created such a large discounted amount of coupon code is so that we could test the cart logic and order confirmation email update (we needed to order more than 20 pcs, and the shipping fee was very high).

Hope that makes sense.

**Subject:** Re: [up-shop.org](http://up-shop.org) - Sep tasks

Hi Michelle,

I'm happy to let you know that we've successfully pushed all tasks from Staging sites to Production site earlier today.

This push contains the following fixes:

1. Page builder cannot be saved + twitter widget fix
2. Adjust menu manager to fit for header menu navigation
3. Manage attachment fix
4. Compress image prior to upload
5. Remove PayPal codes on non-checkout pages (only loads on product and checkout pages)
6. Order confirmation email & cart logic update
7. Order summary on the right should include voucher amount when voucher used
8. Add Chrome lazy load functionality

The screenshots images are too large for me to attach within this email, I've uploaded the screenshots onto shared drive:

<https://drive.google.com/drive/folders/1bojOfb2moOusQa8zqidypi4L7yldGmv1?usp=sharing>

In addition, could you help refund the following test orders:

#000008899, #000008896, #000008890, #000008887

lup-shop.org

**Subject:** Re: [up-shop.org](http://up-shop.org) - Sep tasks

Hi Michelle,

Thanks for the feedback.

For page builder issue, I've checked on my end but I could not replicate the issue.

Cron jobs are running every minute on the site, so it might have been browser cache for this instance.

However, while I was testing, I did notice that sometimes page builder is loading slow (it will save successfully, but just loads really slowly).

Since we have only removed partial of Madia's custom codes on page builder, in order to optimize, we recommend removing ALL of Madia's custom codes, and replace it with HTML codes, just like what we did for Twitter widget.

In the screenshot below, here's Madia's customized codes on page builder currently:

```
michael@michael-laptop:~/mgc/Master$ vim app/code/Madia/Frontend/view/adminhtml/pagebuilder/content_type/  
banner.xml card.xml row.xml tabs.xml  
/michael@michael-laptop:~/mgc/Master$ vim app/code/Madia/Frontend/view/adminhtml/pagebuilder/content_type/
```

We could remove their codes to see how much it broke the site, and then we can know how much time we would need to adjust with, using HTML codes.

For now, page builder itself is working fine, only sometimes it is slow when saving. This is just a future optimization suggestion.

Regarding pushing all of the tickets onto Production site, I understand the urgency of this batch's fixes, therefore I'd like to schedule to push **tomorrow (September 23rd) morning at 9:30 AM Taiwan time** (3:30 AM Netherlands time).

Let me know if you approve us to push to production site during the suggested time above, thanks!

Hi Queenie,

### 1. Page builder cannot be saved + twitter widget

[Michelle] For this page builder issue, we can try different mode to edit & save it for now. **Please push to production site for now.**

How long does it take to make the homepage update? I modified the button from "UP Squared Pro" to "UP Squared Pro System", Flush Magento Cache and Quick Purge [homepage](#), but waiting for 15 mins, still not update (test on Google Chrome Guest mode).

I also tried to modify other page (<https://mcstaging.up-shop.org/delivery-information>, added Twitter code), it updated immediately.

## **2. Adjust menu manager to fit for header menu navigation, in order to increase header dropdown elements**

[Michelle] tested and confirmed, please push to production site.

Thank you for all the explanation, please see our feedback below:

## **3. Manage attachment fix**

[Michelle] tested and confirmed, please push to production site.

## **4. Import simple product function (designed for stock status field automatically change to out of stock issue)**

Estimated hours required: 12 hrs total (excluding special characters validation)

Status: Currently working on this task on local environments

[Michelle] will follow up when Astral Web is back from the national holiday.

## **5. Reduce the product image size & Compress image prior to upload**

[Michelle] tested and confirmed, please push to production site.

## **6. Remove PayPal codes on non-checkout pages**

[Michelle] tested and confirmed, please push to production site.

Here I added other tasks from August which are pending on Staging site, just to make sure you push all of them together to production site:

## **7. Order confirmation email & cart logic update ([approved to be pushed by AAEON](#))**

8. Order summary on the right should include voucher amount when voucher used ([approved to be pushed by AAEON](#))

9. Add Chrome native lazy load functionality to speed up website loading

[Michelle] okay, please push to production site

Could you let me know when do you schedule to push to production site please?

Thank you.

Best regards,

Michelle

**Subject:** Re: [up-shop.org](http://up-shop.org) - Sep tasks

Hi Michelle,

The following tasks have been completed and pushed to **Staging site**, you may go ahead and review:

### 3. Manage attachment fix

Hours used: 4 hrs

Status: Under review by AAEON on Staging site, awaiting to be pushed to production site

### 4. Import simple product function (designed for stock status field automatically change to out of stock issue)

Estimated hours required: 12 hrs total (excluding special characters validation)

Status: Currently working on this task on local environments

## 5. Reduce the product image size & Compress image prior to upload

Hours used: 4 hrs

Status: Under review by AAEON on Staging site, awaiting to be pushed to production site

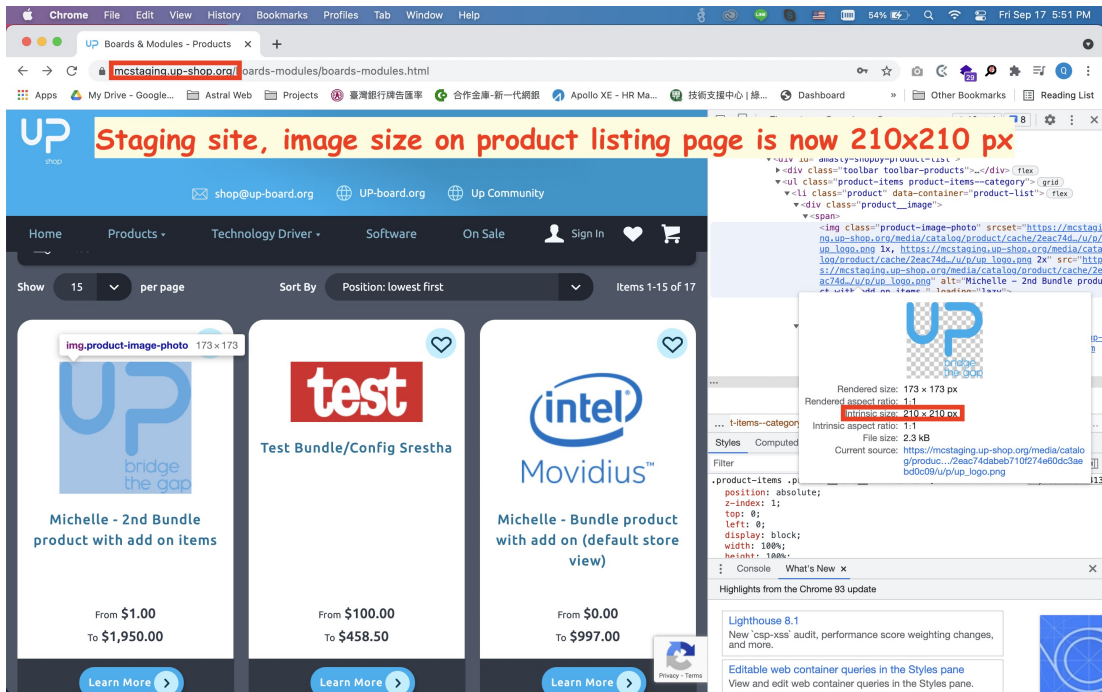

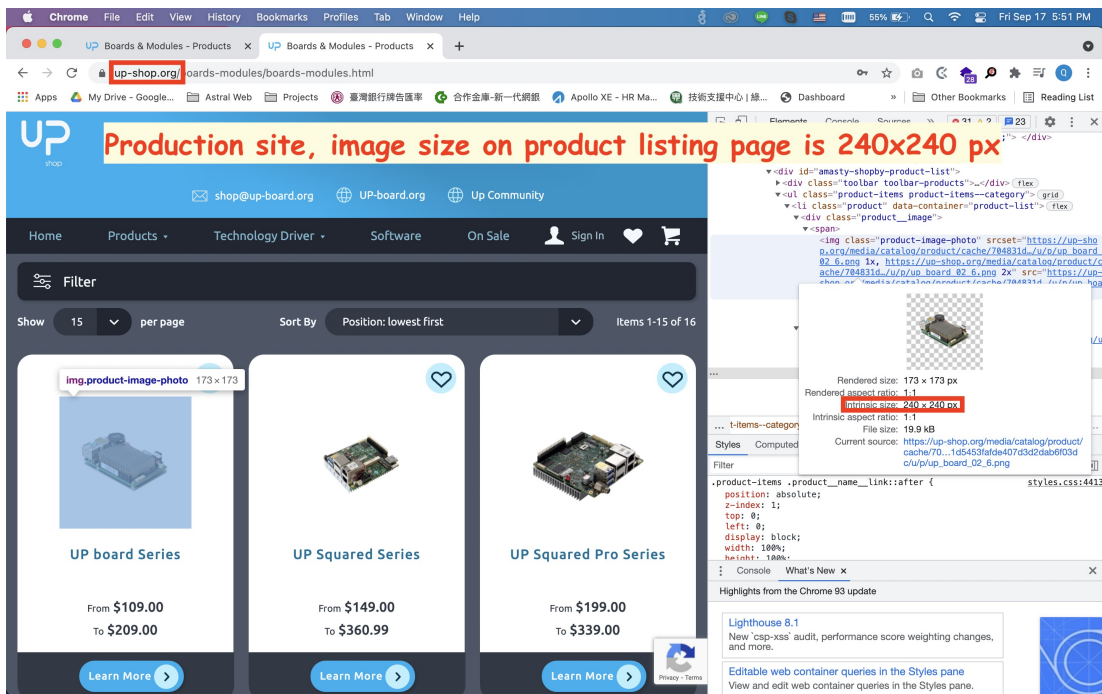

Note that Reduce the product image size & Compress image prior to upload are essentially the same, so we have only developed compress image prior to upload task.

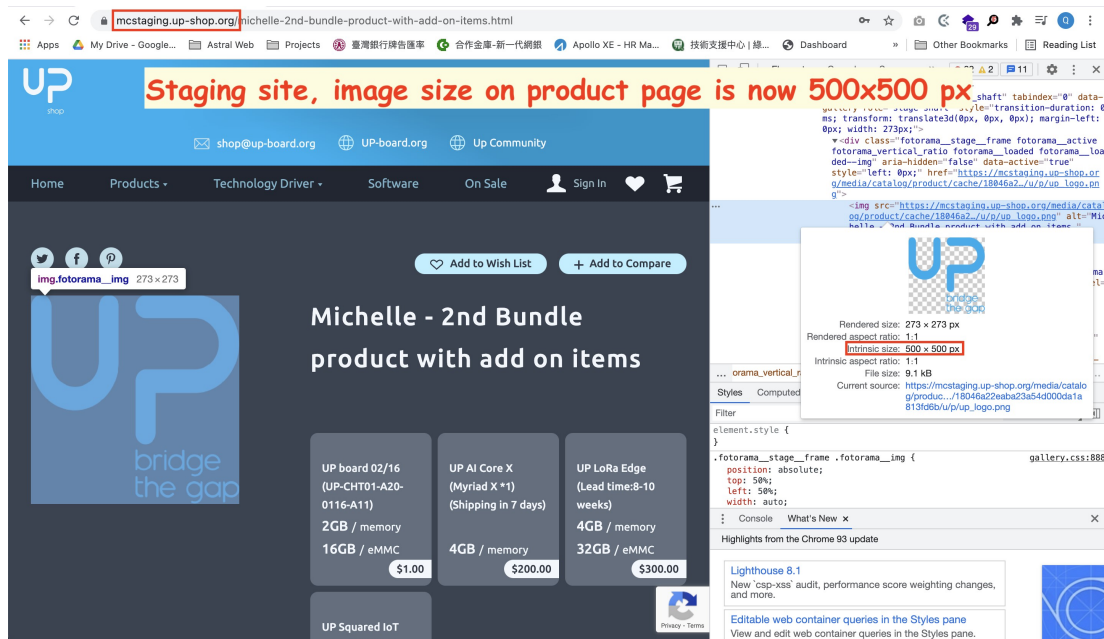

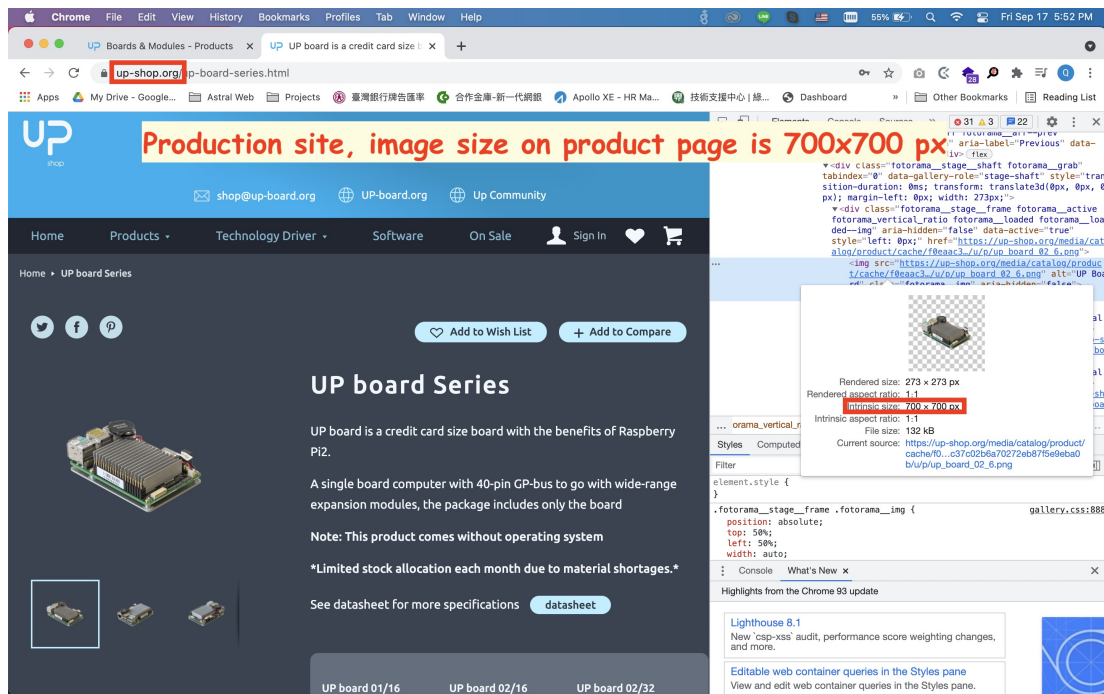

Testing method:

On Staging site, go to any **product listings (category) page** > right click > inspect > select any of the product images within the listing page > find the image source code on the right hand panel > see "Intrinsic size", and you will see that now the maximum image size on Staging site is 210x210px (it was 240x240px prior to the change)

On Staging site, go to any **product details page** > right click > inspect > select any of the product images within the product details page > find the image source code on the right hand panel > see "Intrinsic size", and you will see that now the maximum image size on Staging site is 500x500px (it was 700x700px prior to the change)

Screen recording: [https://drive.google.com/file/d/1LZgOO-h5PEOsaQQZuqOJrK\\_caC0lq-aY/view?usp=sharing](https://drive.google.com/file/d/1LZgOO-h5PEOsaQQZuqOJrK_caC0lq-aY/view?usp=sharing)

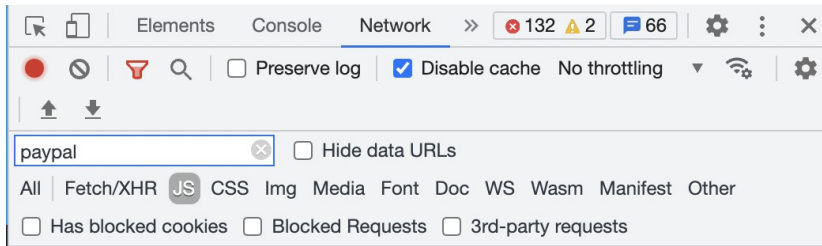

## 6. Remove PayPal codes on non-checkout pages

Hours used: 8 hrs

Status: Under review by AAEON on Staging site, awaiting to be pushed to production site

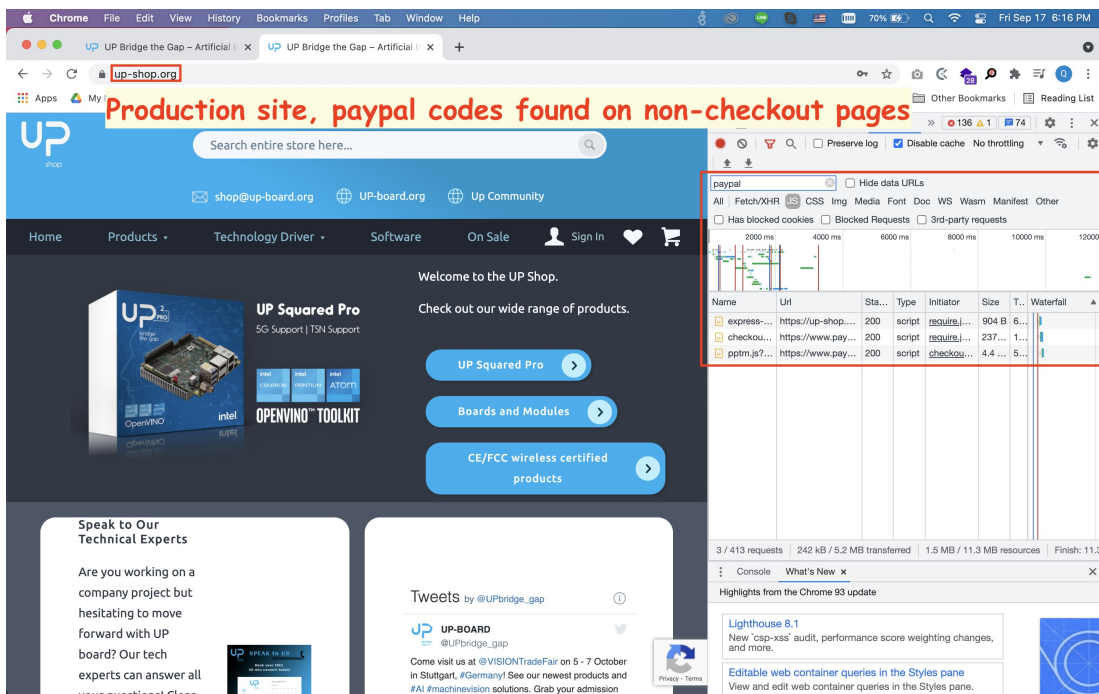

Testing method:

On Staging site, go to any page > right click > inspect > click "Network" on the top > make sure "Preserve log" is NOT checkmarked > click "JS" > type to filter "paypal" > reload page

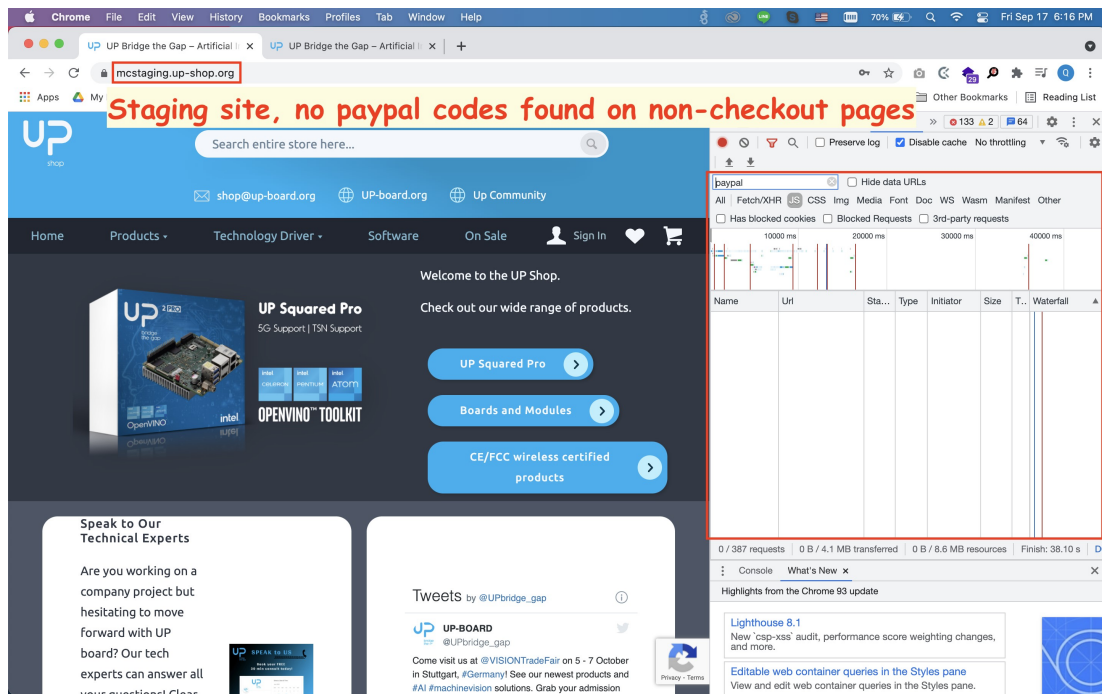

You will see that PayPal codes will now ONLY load when on product page and checkout related pages.

Screen recording: [https://drive.google.com/file/d/1Wc6yH1qInA5S9sGbyHBm\\_VA-c0mJwld4/view?usp=sharing](https://drive.google.com/file/d/1Wc6yH1qInA5S9sGbyHBm_VA-c0mJwld4/view?usp=sharing)

Let me know if you have any questions, and if you approve us to push Staging site's codes onto production site.

Note that when we push from staging to production, we will have to push EVERYTHING (all fixes that are already on Staging site).

Thanks, have a great weekend!!

Queenie Chung 鍾萱 Project Manager

Dear Michelle,

For September/October's tasks, please see below feedback:

**1. Page builder cannot be saved + twitter widget**

Hours used: 6 hrs

Status: Under review by AAEON on Staging site, awaiting to be pushed to production site

**2. Adjust menu manager to fit for header menu navigation, in order to increase header dropdown elements**

Hours used: 5 hrs

Status: Under review by AAEON on Staging site, awaiting to be pushed to production site

**3. Manage attachment fix**

Hours used: 4 hrs

Status: Unable to be pushed to Integration site due to deployment flow issue, awaiting on Magento Support's feedback

**4. Import simple product function (designed for stock status field automatically change to out of stock issue)**

Estimated hours required: 15 hrs total (including new requirements)

Status: Awaiting on AAEON's approval for us to work on the task

**5. Reduce the product image size & Compress image prior to upload**

These two tasks are essentially the same, and this is what we will do:

Modify default Magento's compress image ratio (making the image compressed ratio to be smaller)

When admin uploads an image to Magento, Magento will automatically compress the image to its best fit size.

However, we can make the compressed image size smaller, more fitting to different pages on frontend.

Estimated hours required: 4 hrs

Status: Currently working on this task on local environments

## 6. Remove PayPal codes on non-checkout pages

Estimated hours required: 8 hrs

Status: Currently working on this task on local environments

Side note: as mentioned during yesterday's meeting, Astral Web is off for national holidays on September 20th (Monday) and September 21st (Tuesday).

You can still reach us via text or email if there's anything urgent. But please note there might be a slight delay response.

We will be back to our normal hours on September 22nd (Wednesday).

Let me know if you have any questions, thanks!

Hi Queenie, Ori,

For September tasks, we'd like to implement the following tasks.

Let me know if any questions, thank you.

Task	Hours	Timeline
Page builder cannot be saved + twitter widget	6	Sep
Manage attachments not working	4	Sep
Stock Status field automatically changes to Out of Stock	TBC (wait for Astral Web's evaluation)	Sep
[Discussed in Aug] Reduce the product image size (row 85)	5	Sep
[Discussed in Aug] Compress image prior to upload (row 90)	4	Sep
[Discussed in Aug] Remove PayPal codes on non-checkout pages	8	Sep/Oct
[Discussed in Aug] Improve the load speed of menu navigation as the dropdown elements on header are slow	5	Oct

Best regards,

Michelle
